

As you can see, the world's smartest hot water systems are disappearing fast!

Introducing the Merlin Niche – an innovative and space saving recess device that reduces the protrusion of the Merlin 600E hot water system by 140mm. Now that's smart!

 **MERLIN**
NICHE

It's yet another reason to make it a Merlin.

- The Merlin Niche can be painted to match any colour scheme to ensure true integration with residential or commercial design style
- Easy to install and ideal for solving narrow access issues
- Cleverly conceals pipes, valves and connections behind a robust moulded cover
- Ideal for installation in brickwork during construction using integral galvanised steel straps
- Suitable to be retro-fitted into a 460mm wide by 1120mm high cut-out
- Designed specifically to house the Merlin 600E
- Manufactured in WA using vacuum moulded UV stable ABS plastic

Merlin 600E features and benefits

Continuous flow

Never runs out of hot water.

Powerful

Free flowing at mains pressure. Powerful enough to run two showers at the same time.

High efficiency

The cleanest and most economical water heater available. Produces less greenhouse gas. Operates satisfactorily on low pressure gas supplies.

Electronic scald protection

Reduces the risk of scalding.
No need for expensive tempering valves.

Wireless remote control

No wiring to install. Remotes can be added at any time.

Dual fuel NG/LPG

Conversion only requires minor adjustment of mixture.

Australian made

Money stays in Australia. Replaces imports.
