

A hot water system that can save you cold, hard cash.

How ironic.

The Merlin 600E can save you around 30% on your water heating bills compared with a typical gas-fired storage water heater, and around 45% compared with electric. That's the Merlin advantage!

Thanks to some very good science right here in Western Australia, a new thermal efficiency benchmark has been set for gas-fired hot water systems that no other water heater can come close to.

The Merlin 600E is a continuous flow system that gives you the convenience of reliable, controllable hot water that never runs out, and is powerful enough to run two showers at once. Merlin is the most economical way to

heat water for your home. To find out why more and more people are turning to Merlin for their hot water needs, please visit our website or call us for more information — and save yourself some cold, hard cash.
