

Handsome, clean living greenie seeks good home.

Merlin is the cleanest and most efficient gas-fired water heater available. The amazing Merlin 600E produces 75% less greenhouse gas than an electric storage water heater and 36% less than some gas-fired storage water heaters. Merlin even produces less greenhouse gas than a typical solar water heater with electric boost.

To enjoy the convenience of controllable, reliable hot water that never runs out, while saving money and the environment, tell your plumber or builder to, "Make it a Merlin!"
