

Slim, penny-wise stunner seeks domestic position.

Merlin is the most economical way to heat water for your home. Thanks to the unit's extremely high efficiency, running costs are very low. So low in fact, you can expect to save around 30% on your water heating bills compared with a typical gas-fired storage water heater, and a massive 45% when compared with electric.

To enjoy the convenience of controllable, reliable hot water that never runs out, while saving money and the environment, tell your plumber or builder to, "Make it a Merlin!"
